Profile Summary

Result-oriented Computer Science Engineering Graduate specializing in Full-Stack Web Development, MERN stack patterns, and RESTful architectures. Proven track record designing scalable web applications optimized with role-based access controls, robust middleware routing, and relational/non-relational database integrations. Ready to implement clean code codebases immediately.

Technical Skills

- **Frontend Skills:** React.js, JavaScript (ES6+), Bootstrap, HTML5, CSS3, UI Design
- **Backend Skills:** Node.js, Express.js, RESTful APIs, MVC Architecture
- **Database Management:** MongoDB, Mongoose ORM, MySQL, DBMS
- **Programming Languages:** JavaScript, Java (Data Structures & Algorithms)
- **Authentication & Security:** Passport.js, JSON Web Tokens (JWT), bcrypt cryptography

Projects

JourneyHub –<https://journeyhub-zsgq.onrender.com/>

- Engineered a scalable RESTful booking pipeline following MVC architecture, optimizing MongoDB document schemas and embedded data models for seamless retrieval.
- Implemented robust user authentication pipelines utilizing JSON Web Tokens (JWT) and bcrypt password-hashing with secure route protection middleware.
- Integrated dynamic multi-parameter search filters and automated booking validation logic, rendering complex states using EJS templates.
- Tech Stack: MongoDB, Express.js, Node.js, EJS, Bootstrap, JWT, bcrypt

Workbridge –<https://workbridge-gizo.onrender.com/>

- Engineered a localized digital employment platform to connect local blue-collar workers (masons, plumbers) with contractors for real-time job matching.
- Structured distinct multi-tier authentication boundaries (Admin, Contractor, Worker, Customer) leveraging Passport.js session management and secure routing middleware.
- Tech Stack: Node.js, Express.js, MongoDB, EJS, Bootstrap, Passport.js, bcrypt, JavaScript

Prescripto

- Developed a modular MERN stack healthcare application utilizing React.js component architecture for optimized client-side view rendering and state transitions.
- Implemented stateless user and administrator authentication pipelines relying on JSON Web Tokens (JWT) mapped alongside role-based access control (RBAC).
- Tech Stack: MongoDB, Express.js, Node.js, React.js, Cloudinary API, JWT, bcrypt

Education

Allenhouse Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Jul 2022 - May 2026

Ramrati Shiksha Sadan Inter College

Senior Secondary (Class XII)

Apr 2019 - Mar 2021

Certifications

- **O-Level Certificate** – Standardized Technical Computing Credential.
- **Java Programming with DSA** – Problem Solving and Data Structures Specialization.
- **DRDO International Workshop** – Advanced Technology and Research Symposium Participation.
- **AKTU | GUVI | HCL AI Tech Confluence** – Dedicated Hackathon Product Engineering Challenge.

Achievements

- Selected for internship at Choice Connect Pvt. Ltd. through AKTU in June 2025.
- Achieved a rank of **14,336** in **AINCAT 2025** (India's Biggest Career Aptitude Test) conducted by Naukri Campus – May 2025
- Secured 1st position in internal Web Development Project Showcase at college.

Relevant Coursework

Data Structures & Algorithms, Database Management Systems (DBMS), Object-Oriented Programming (OOP), Relational Databases (MySQL), UI/UX Design Principles

EXTRACURRICULAR

- Participated in competitive coding challenges on platforms like **LeetCode, HackerRank, and CodeChef**.
- Regular contributor to open-source projects and active in web development communities.
